II - MAGIC NUMBER TABLEL - 1
III - ELAPSED TIME TO MPH, 1/16 MILE STRAIGHTAWAY.....L - 2
IV - ELAPSED TIME TO MPH, 1/3 MILE OVAL.....L - 3

WORLD RECORDS

IMPBA World Records can change every 4 - 5 months. Due to this fact, the current records will only be posted on the IMPBA Website under the heading "Record Holders"

Due to Class restructuring, some of the records set prior to 1 January, 2002, have now become illegal with the new classes. To be fair to those that set records according to rules that were in place these records are kept in recognition of those achievements. Class changes may periodically require archiving of records.

I - CONVERTING TIME TO SPEED

At any timed event, the time given to complete either two laps of the oval, or the average of two passes on the straightaway may be easily calculated by taking the 'magic' number and dividing with the time in seconds.

For straightaway, the speed is calculated from the average of two successive, opposite passes on the straightaway course. This means a contestant must do a left to right (L-R) pass and then a right to left (R-L) pass. The average of the two passes is the record. Please note that a contestant may do the two passes in any order, example R-L followed by a L-R is also allowed.

II - MAGIC NUMBER TABLE

Course	Magic Number
1/16 Mile Straightaway	225
1/3 Mile Oval	1200
1/4 Mile Oval	900
1/6 Mile Oval	600
1/31 Mile Straightaway	115.9
1/5 Mile Oval	720.68

III - ELAPSED TIME TO MPH CONVERSION For The 1/16th Mile Straightaway Course
